

Bali Asia International Model United Nations (BAIMUN) is a simulation of an actual United Nations conference, where participants are tasked with solving a global issue through research, drafting, lobbying and debate to pass a suitable 'resolution'.

After successfully held the first BAIMUN in 2019, BAIMUN II is finally back with more challenging topics yet very relatable with the world's current issue which is "The Evolving of Cultural and Environmental Awareness for a Brighter Future". Henceforth, delegates of BAIMUN II are expected to find a possible solution to solve that particular issue, whilst also trying to improve their communication and diplomatic skills, critical thinking, and networking.

BAIMUN II is held on January 18th - 21st, 2020 at Bali International Convention Centre, Nusa Dua. In the event candidate is allotted to particular council and country where He/She has to represent council and country. A student of 1st year Automobile Engineering Department Dhaval Ratish Kakkad (Enrollment No. 190200102030) had participated in BAIMUN. He was allotted to the council United Nations General Assembly (UNGA) and country Belgium, for the event.

He was declared the winner of the Best Verbal Commendation Award for my committee.
